Issue No: 1

ENVIRONMENTAL POLICY

D&R Henderson Pty Ltd is a medium sized company that manufactures sawn timber and particleboard products for domestic and export markets.

Through implementing and Environmental Management System, D&R Henderson has identified the site environment aspects and impacts and has developed objectives, targets and operational control procedures to minimise impact on the environment and to prevent pollution.

The identification of environment impacts includes consideration of:

- emissions to air
- water discharges
- waste management
- use of resources and
- local community / environment (odour, noise and nuisance dust)

Through the ongoing environment management of its activities, D&R Henderson will:

- Comply with all legal requirements including statues, acts, regulations and licences applicable to its business activities.
- Consider environment issues when developing business strategies and initiatives.
- Monitor, minimise and dispose of all unavoidable waste in a manner that has the least detrimental impacts of the environment.
- Review the identified environment impacts to ensure the action to reduce the impacts is appropriate, timely and in accordance with recognised practices.
- Established, maintain and review an Environmental Management Systems that details targets and strategies to be undertaken that continuously improve our level of environment performance and further prevent pollution.

Our commitment to managing impacts on the environment is understood by all our staff.
