

Soft Touch Super Matte Board

Soft Touch Super Matte

Is a great solution as an Anti Reflective finish which cuts and edges really well, with great stain resistance. Our product is manufactured with a highly durable PVC foil coating to withstand what life will throw at it. Soft Touch Super Matte's finish is on trend at the moment, with many starting to move away from gloss. Looking for elegance without breaking the budget?

Soft Touch Super Matte Board

Soft Touch Technical Properties

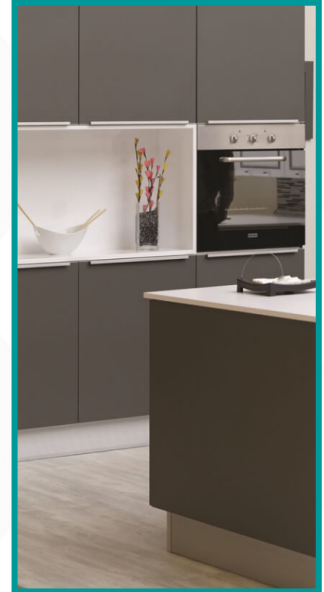

Panels are made up of a premium quality MDF (Medium Density Fiberboard) panel substrate that has been laminated, with a 0.30 mm decorative polymer film overlay or RTF (Rigid Thermoformable foil) using PUR adhesive (reactive polyurethane) that provides the highest structural bonding strength.

Benefits

A decorative polymer film overlay that is impact resistant to chipping, cracking or breaking compared to similar panel solutions.

A less expensive alternative to painted material

Easy maintain and clean.
